

		Name	Symbol	Features	Size	Thick.	Coat	
COATED SOLVENT MEDIA		<b>BACKLIT</b> <b>HIT</b>	BAM 130SM	A coated polyester which allows to illuminate the images from behind. It can be used for any back-light applications, including city lights and light boxes, as well as all displays and expo-lighting systems.	0.91, 1.10, 1.27, 1.52 x 50 m	210 µ	Semi-mat	
		<b>BLOCKOUT</b> <b>HIT</b>	BLM 610SM	A coated firm combination of PP+PET+PP intentionally laminated with black adhesive in order to block the light from both sides. Perfect for high-class resolution printing with any solvent ink. Used for roll-ups, pop-ups and any POS application.	0.91, 1.10, 1.27, 1.52 x 50 m	240 µ	Semi-mat	
		<b>SMART</b>	SMM 310G	Product based on a "non-woven fabric" material. It is applicable to any plotters using solvent, mid-solvent and eco-solvent inks. The printing speed on this material may reach even 80 m <sup>2</sup> /h without any loss in its quality. Adjusted to any kind of indoor applications, including photography, pictures, posters, etc	0.91, 1.10, 1.27, 1.52 x 50 m	315 µ	Gloss	
		<b>PHOTO PAPER</b>	PPM 220G	A photo paper for super-high color brilliance, precise image definition and sustained durability. Its base material is double-sided PE coated in order to protect the image against unfavourable atmospheric conditions. Thanks to our unique type of coating, the highest resolution and super-high colour brilliance will become your standard.	0.91, 1.10, 1.27, 1.52 x 50 m	220 g/m <sup>2</sup>	Gloss	
UV PRINTING MATERIALS		<b>BACKLIT UV</b> <b>HIT</b>	BUV 130SM	A perfect innovation in digital printing – Backlit designed especially for printing with UV large format printers! Superb for expo-lighting systems of all types. Backlit UV will help you to achieve the sharpness of details, high resolution and durability.	0.91, 1.10, 1.27, 1.52 x 50 m	180 µ	Semi-mat	
		<b>BLOCKOUT UV</b>	BLM UV	A coated firm combination of PP+PET+PP laminated with black adhesive in order to block the light from both sides. It was designed to be used with any type of UV printer and can be printed on both sides. Applicable especially to roll-ups, pop-ups, POS graphics, shop-window graphics, displays and any other application which requires blocking the light from both sides.	0.91, 1.10, 1.27, 1.52 x 50 m	220 µ	Semi-mat	
		<b>CLEAR BACKLIT FILM UV</b>	CUV 175	A transparent material based on 175-micron uncoated polyester layer. Its application is similar to Backlit Ikonos but it is devoted only to be used on UV printers. Adjusted to any kind of back-light applications (including city lights and light boxes), as well as all displays and expo-lighting systems. Allows to illuminate frontprint posters from behind.	0.91, 1.10, 1.27, 1.52 x 50 m	175 µ	Gloss	
PVC MATERIALS	MONOMERIC	Printing	<b>PROFIFLEX PRO</b> <b>HIT</b>	GPT 100+ MPT 100+	A white, glossy (GPT 100+) or matt (MPT 100+), monomeric, calandered self-adhesive PVC (vinyl), specially designed for printing on solvent printers in high speed with high quality. Perfect for all indoor applications as well as for short- and midterm outdoor usage.	1.05, 1.27, 1.37, 1.60 x 50 m	100 µ	Gloss (GPT 100+) Mat (MPT 100+)
			<b>PROFIFLEX PRO (gray glue)</b>	GPG 100+ MPG 100+	A white, monomeric, self-adhesive PVC in gloss (GPG 100+) and matt (MPG 100+) version with permanent, grey glue. It can be used for all indoor applications and short- or midterm outdoor usage.	1.05, 1.27, 1.37, 1.60 x 50 m	100 µ	Gloss (GPG 100+) Mat (MPG 100+)
			<b>PROFIFLEX PRO (removable glue)</b>	GRT 100+ MRT 100+	Glossy (GRT 100+) or matt (MRT 100+), monomeric, self-adhesive PVC with removable, transparent glue. Perfect for all indoor applications as well as for short- and midterm outdoor usage.	1.05, 1.27, 1.37, 1.60 x 50 m	100 µ	Gloss (GRT 100+) Mat (MRT 100+)
			<b>"Wally" (ultra-removable glue)</b> <b>NEW</b>	GWT 100+ MWT 100+	Profiflex Pro MWT 100+ "Wally" is a white, monomeric PVC with transparent, removable glue is dedicated for interior walls decoration, and can be printed on any type of solvent or eco-solvent plotters.	1.05 x 50 m	100 µ	Gloss (GWT 100+) Mat (MWT 100+)
			<b>PROFIFLEX PRO (clear PVC)</b> <b>NEW</b>	GPT CLR	A transparent, glossy, monomeric, calandered self-adhesive PVC (vinyl), specially designed for printing on solvent printers in high speed with high quality. Perfect for all indoor applications as well as for short- and midterm outdoor usage.	1.05, 1.37, 1.60 x 50 m	100 µ	Gloss
			<b>ONE WAY VISION</b> <b>HIT</b>	Ikonos OWV	Perforated, white flexible vinyl laminate. Which gives a one-way-mirror-effect and thus can be used for decoration or advertising purposes of bus or subway windows, shopping windows, building windows, rear-windows etc. Applicable to any solvent and eco-solvent digital printers.	1.06, 1.27, 1.37, 1.52 x 50 m	160 µ	Gloss
		Laminating	<b>LAM-PRO</b> <b>HIT</b>	GPT L80+ MPT L80+	A transparent, monomeric, self-adhesive overlaminating film. Provides the picture with high brilliance (GPT L80+) or matt effect (MPT L80+), intensifying its colours and extending durability. Protects pictures and images from mechanical damage, moisture and UV radiation. Can be used for indoor applications and short- or midterm outdoor usage.	1.05, 1.27, 1.37, 1.60 x 50 m	80 µ	Gloss (GPT L80+) Mat (MPT L80+)
	POLYMERIC	Printing	<b>PROFIFLEX PRO</b>	GPT P80+	A self-adhesive 80-micron polymeric, calandered vinyl with permanent, transparent glue for long- and midterm indoor and outdoor usage. Product duration may reach from 5 (outdoor, unprinted film) to 7 years (indoor, unprinted film).	1.05, 1.37 x 50 m	80 µ	Gloss
			<b>PROFIFLEX BACKLIT</b>	MPT B80+	A translucent, white, matt, self-adhesive 80-micron polymeric vinyl with permanent, transparent glue, specially designed for all backlit applications. Adjusted to long- and midterm indoor and outdoor usage.	1.05, 1.37 x 25 m	80 µ	Mat
		Laminating	<b>LAM-PRO</b>	GPT LP75+	A 75µ, polymeric, transparent overlaminating film with UV absorber; extends durability of the picture, reduces colour fading and effectively retards deterioration caused by weather conditions.	1.05, 1.37 x 50 m	75 µ	Gloss
Decoration		<b>PROFIFLEX DECO</b> <b>HIT</b>	FPT 80+ DPT 80+	A polymeric, long-term, self-adhesive glass decoration PVC film. Recommended for any flat and transparent surfaces such as windows, shop windows, glass doors, mirrors, etc. Can be easily applied on glass or other flat and transparent surface so as to reach frosted (FPT 80+) or sandblasted/dusted (DPT 80+) effect.	1.05, 1.27 x 25 m	80 µ	Frosted (FPT 80+) Dusted (DPT 80+)
